

Washington Conservation Commission

Thank you for taking part in our Invasive Plants Tracking Survey.

You have received one of our packets. In it you will find a 3 page Invasive Plants Identification Guide and several tracking sheets.

When you find a plant that you think is an invasive check the Guide for help in identifying it.

Fill out ONE Invasive Species Tracking sheet for each species of plant or patch of plants you find. Please fill in each section of the sheet to help us map where your plant was found.

Make comments in the bottom section, if you have any.

Take a picture of your plant, if you have a camera. You can email the pictures to us – wcc@washingtongh.org Please give us your name and location of the plant so we can connect the picture to your tracking sheet.

Please return your packet and tracking sheets to the Town Hall when you are finished.

We will be mapping all the invasive plants that are found in Washington. Check the Conservation Commission website in the near future for the map results.
